Example Computing Lab Handbook

This is fictional sample material written for TraceSearch demonstrations. It is not an institute policy.

Equipment returns

Loaned lab adapters must be returned to the equipment desk before 5 PM on the next working day. If an adapter is damaged, record the item identifier and notify the lab coordinator.

Maintaining experiment records

Each experiment record should include the dataset version, program version, configuration, hardware description, and observed result. Keep unsuccessful experiments so later comparisons do not hide failed approaches. Never report a localhost measurement as a Wi-Fi benchmark.
